Experience

Digixy Global Consulting

Web Development Trainee

Remote

04/2024 – Present

- As a Web Development Trainee at Digixy Global Consulting, I designed and developed the company's responsive website and additional web pages, collaborating with senior developers to enhance user experience, optimize performance, and integrate key digital empowerment content.
- Created multiple web pages utilizing HTML, CSS, and JavaScript, WordPress ensuring compatibility across various browsers and devices.
- Performed website optimization to improve loading times and overall performance.
- Conducted comprehensive testing and debugging, ensuring seamless functionality and an optimal user experience.
- Enhanced the website's visual appeal and usability through innovative design techniques and modern web development practices.

PedalStart

Front End Development Trainee

Gurgaon

08/2023 – 01/2024

- Spearheaded front-end development projects as a trainee at a dynamic startup, demonstrating proficiency in HTML, CSS, and JavaScript to create visually appealing and responsive user interfaces.
- Collaborated closely with cross-functional teams to understand project requirements, contributing innovative ideas and implementing design concepts that enhanced the overall user experience.
- Successfully tackled challenges in optimising website performance, employing best practices in coding and leveraging frameworks like React to create efficient and seamless web applications.
- Played a pivotal role in implementing responsive design principles, ensuring seamless user experiences across various devices and screen sizes.
